T-TYPE SET UP GUIDE

MAXIMIZING GEAR SHIFTING - T-TYPE SET UP

PREPARATION

Before the transmission can be installed, the chain length and derailleur must be prepared.

CHAIN LENGTH

See the table to find the recommended chain length for your frame size.

CHAIN LENGTH GUIDE

FRAME SIZE	SET UP KEY	SET UP COG	CHAIN LENGTH No Lower Guide Required	CR. SIZE	MAX CR. SIZE
S1	B	7	114 LINKS	32T	34T
S2	B	7	116 LINKS	32T	36T
S3	B	7	118 LINKS	32T	38T
S4	B	7	120 LINKS	32T	38T

SRAM's T-Type transmission requires a specified setup procedure based on chain length and derailleur configuration. This setup does away with the need for b-tension adjustments.

NOTE – SRAM T-Type is only compatible with frames equipped with SRAM's Universal Derailleur Hanger (UDH) fitment.
